Special Stains Kit

Complete range

Histology special stains use reagents and solutions made from histological dyes to identify and demonstrate specific structures and cellular components that aid pathologists in the evaluation of certain diseases.

Histo-Line Laboratories offers the most commonly used special stain kits for your research needs.

All of our special stain kits contains solutions that are **pre-diluted, ready to use form**.

A step by step protocol is provided for each kit for the convenience of users.

It is possible to purchase each kit with bulk volumes for each reagent or at a specific volume on request.
